

POSTER LIST

- P 1 Timothy Ajayi: Energy generation through waste water as a remedy for better governance: A case study of the City of Lagos, Nigeria
- P 2 Marcus Altmaier: ThermAc - a collaborative project on aquatic chemistry and thermodynamics of actinides at elevated temperature conditions
- P 3 Marcus Altmaier: A state-of-the-art report within NEA-TDB to assess modeling and experimental approaches in aqueous high ionic-strength solutions relevant for nuclear waste disposal applications. OECD/NEA Thermochemical Database Project (TDB)
- P 4 N. Atamas: The solubility of the non-polar substances in ionic liquids
- P 5 Kyung-Youl Baek: Solubility control of CNT by block copolymer surfactant both in solution and in solid
- P 6 Shipra Baluja: Thermodynamic models for determination of solubility of Alloxan in various solvents at different temperatures
- P 7 Shipra Baluja: Solubility and solution thermodynamics of hippuric acid in various solvents from 298.15 K to 328.15K
- P 8 Valerie Baranauskaitė: NMR study of the structural-dynamic characteristics of the ternary system CsCl-LiCl-D₂O in the interval from 25°C to the freezing temperature
- P 9 Frank Bok: THEREDA – The thermodynamic reference database for a nuclear waste disposal in Germany
- P 10 Frank Eckert: Liquid extraction of rare earth metals with ionic liquid solvents: Modeling with COSMO-RS and experimental verification
- P 11 David Fellhauer: Radionuclide source term estimations for generic nuclear waste disposal options within the ENTRIA project
- P 12 Federico M. Ferrero Vallana: A new technique for studying vapour-liquid equilibria of multicomponent systems
- P 13 Nedyalka Georgieva: Synthesis and properties of a new Betti base
- P 14 Tee Yong Goh: Solubility of propylene/propane gas in ionic liquids
- P 15 Maria Rosa González-Siso: Study of the interaction of Pu, U and Tc with iron corrosion products under highly alkaline conditions
- P 16 Lijiang Guo: Thermodynamic and phase equilibrium of the solid solution containing system KCl-RbCl-H₂O at 298.15 K and 323.15 K
- P 17 Johan Jacquemin: A class of efficient short-chain fluorinated cationic surfactants

- P 18 Johan Jacquemin: New method for the estimation of viscosity of pure and mixtures of ionic liquids based on the UNIFAC-VISCO Model
- P 19 Taishi Kobayashi: Solubility and complex formation of zirconium carbonate in dilute to concentrated NaNO_3
- P 20 Dongdong Li: Solid-aqueous equilibrium in the Na, K, Rb, Mg // Cl – H_2O system: Experiments, ab initio and thermodynamic modelling
- P 21 Dongdong Li: Accurate measurement of the co-saturation lines in the $\text{NaCl-MgCl}_2\text{-H}_2\text{O}$ system and its application for $\text{MgCl}_2 \cdot 6\text{H}_2\text{O}$ purification using re-crystallization method
- P 22 Keith B. Lodge: A new method for the measurement of fugacity and the Henry's law constant for volatile organic compounds containing chromophores
- P 23 Kavosh Majlesi: Thermodynamics (solubility and protonation constants) of risedronic acid in different media and temperatures (283.15 K to 318.15 K)
- P 24 Takashi Makino: CO_2 chemisorption in acetate ionic liquids and ethylene glycol mixtures
- P 25 Agathe Martignier: Unicellular planktonic organisms: an intracellular environment chemically different from the surrounding freshwater
- P 26 Abbes Mizane: Dissolution of intermediate grade phosphate by a dilute mixture of phosphoric acid and sulfuric acid. Influence of certain parameters
- P 27 Aliyar Mousavi: A gravimetric analysis based on sulfur precipitation in thiosulfate-acid reaction and the related equilibrium constant
- P 28 Risto Pajarre: Modelling of REE carbonate precipitation in sulphate rich solutions
- P 29 Risto Pajarre: Hydrometallurgical treatment of jarosite waste
- P 30 Simão P. Pinho: Water solubility of terpenes and terpenoids
- P 31 Yves Schulze: Indium and gallium whole-genome phenotypic screening in yeast and culture media speciation modelling
- P 32 Mark Silver: Assessment of PuO_2^{2+} solubility in high borate media
- P 33 Abhas Singh: Determination of solubility-controlling phases in chromium ore processing residue
- P 34 M. Yu. Skripkin: Solution–solid equilibria in ternary systems $\text{CdI}_2 - \text{Solv}_1 - \text{Solv}_2$ ($\text{Solv}_{1,2} - \text{DMSO}, 1,4\text{-dioxane}, \text{DMA}, \text{DMF}, \text{water}$)
- P 35 Bruno Thien: The super enrichment in Sr and Ba of micropearls in Lake Geneva
- P 36 Ezgi Yalcintas: Solubility of tetravalent $\text{UO}_2(\text{am,hyd})$ in alkaline carbonate solutions
- P 37 Gleb O. Yuriev: Phase equilibria in binary and ternary systems containing water-soluble derivatives of light fullerenes
- P 38 Wiem Zouari: Study of zirconium dioxide dissolution and its surface reactivity in aqueous solution
